

Sheeting Guide Frame

Cross-Trench Utility Shoring Accessory for Build-A-Box™

Advantages

Efficiency Production—America's Trench Box Builder—is proud to unveil its latest accessory to its Build-A-Box modular trench shielding system. The new Build-A-Box Sheeting Guide Frame utilizes lightweight corrugated sheets of aluminum to shore closely around existing cross-trench utilities. The sheets can be installed by hand, and the guide frame panel integrates seamlessly into any Build-A-Box configured system. The result is a safe, maintained trench or pit that allows workers to access existing utilities.

FEATURES

- Guide Frame lengths up to 10 ft.
- 12 in. wide aluminum sheets
- Sheets available in 6 ft. or 8 ft. lengths
- Up to 10 feet maximum depth of trench
- Optional Filler Panel to help seal corners
